

The AxisGO Lens & Thread Caps are designed to protect your lens element and the rear of the lens whether it is another glass element or a lens port opening. Shipping as a kit made up of one front lens cap and one rear thread cap. The front cap is suitable for the standard lens supplied with your AxisGO and Ultra Wide Angle Lens (original and MkII version). The rear thread cap will also suit all standard lenses, UWA lenses and AxisGO dome ports.

Made from strong silicone rubber and designed to snugly fit without touching the glass element.
