

## TROUT SPEY G5

### TROUT SPEY SPECIFIC / FAST ACTION

The TROUT SPEY G5 is built to cover the range of spey applications on your favorite piece of trout water. Whether you're swinging soft hackles on floating lines during late evening hatches or throwing streamers on Skagit heads when the weather cools and there are fewer insects around, the high-performance blank and trout spey-specific action of the G5 will do the job with ease—no back cast or double-haul required. Just lift, set, and fire, and let the TROUT SPEY G5 do its thing. Finding new solutions to old problems has never been more fun.

The TROUT SPEY G5's classically-styled cosmetics—familiar to aficionados of the SAGE RPL—look right at home during trout season. In addition, the G5 features a down-locking reel seat for rod balance, custom-shaped fore and rear handles, and line guides sized to work seamlessly with today's trout spey heads—both Skagit and short Scandi—and running lines. For versatility, the 11'0" 3wt is the go-to, while the 11'3" 4wt model is the tool of choice for those looking to cast heavier streamers or beat a stiff wind. The TROUT SPEY G5 will be perfectly at home on a trout river near you—because two-handed season never really ends.
